

When planning your meeting consider allowing some time for a team building activity and health break

Discovery Tour (Year-round)

A guided exploration of the Harry J. Enns Wetland Discovery Centre and exhibit halls, you will take part in demonstrations and activities related to our many fascinating exhibits. Get a birds-eye view of the marsh from the observation deck and tour our boardwalk over the water.

Geocaching (Year-round)

Learn how to use GPS to explore the marsh while searching for geocaches, small boxes hidden containing logbooks to sign your name and items for trade. This can be customized into a half day or full day Marsh Mystery Challenge for your group.

Voyageur Canoe Excursions

(May to October)

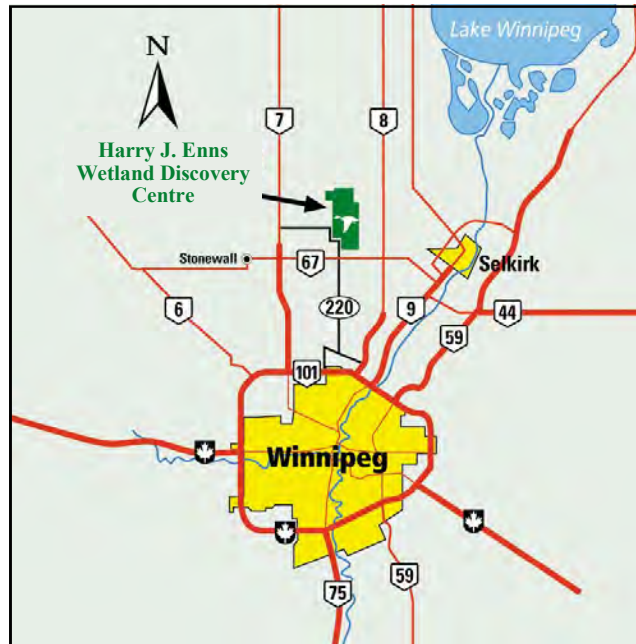

See the marsh from a new perspective in three, 10-passenger voyageur-style canoes. Get a duck's eye view of the plants and animals that call the marsh home. You provide the paddle power!

A Bird in the Hand - Signature Experience

(May to September)

This experience creates an intimate connection with nature where visitors hold a wild bird as they are released after banding. This experience allows them to participate in an important facet of North American research that has been taking place for more than 100 years. The experience also takes participants into the heart of a thriving wetland as they canoe through channels in search of wildlife. More than 300 species of birds have been documented in this 36 square kilometre wetland - an equivalent of half the bird species found in all of Canada.
